Set out in the following table is an explanation of each line of the common disclosure template (above). With regard to the regulatory adjustments, banks are required to report deductions from capital as positive numbers and additions to capital as negative numbers.
For example, “goodwill” (line 8) should be reported as a positive number, as should “gains” (line 14) due to the change in the bank’s credit risk. However, losses due to the change in the bank’s credit risk should be reported as a negative number as these are added back in the calculation of Common Equity Tier 1.
